

On Sunday, at the opening session of JNF's National Conference in Atlanta, a group of young, anti-Israel, anti-JNF protesters barged in, uninvited, shouting lies. Their distortion of the facts underscores our need to be vigilant about the facts and the positive impact JNF makes in Israel and Israel makes in the world. As we know, tens of thousands of our college kids are faced with these distortions and lies everyday. We were given a glimpse of our opponents' desire to disrupt instead of engage in dialogue. We must stand up for our children and arm them with the facts and we must continue to stand up for the land and people of Israel, a light unto the nations, as we have done for 109 years.
